NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U. S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information

collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR part 35, "Medical Use of Byproduct Material."

2. Current OMB approval number: 3150-0010.

3. How often the collection is required: Required reports are collected and evaluated on a continuing basis as needed due to a change in programs or as events occur.

4. Who is required or asked to report: Physicians and medical institutions who are applicants for, or hold, an NRC license authorizing the administration of byproduct material, or its radiation to humans for medical use.

5. The number of annual respondents: 1,891 NRC licensees and 4,728 Agreement State licensees.

6. The number of hours needed annually to complete the requirement or request: 369,916 hours for NRC licensees and 924,765 hours for Agreement State licensees, for a total burden of 1,294,681 hours (196 hours per licensee).

7. Abstract: 10 CFR part 35, "Medical Use of Byproduct Material," contains requirements that apply to NRC licensees who are authorized to administer byproduct material or its radiation to humans for medical use. The information in the required reports and records is used by the NRC to ensure that the health and safety of the public is protected, and that the licensee's possession and use of byproduct material is in compliance with the license and regulatory requirements. The revision is a net decrease adjustment in burden resulting from a decrease in the number of affected licensees.

Submit, by July 2, 1999 comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, 2120 L Street, NW (lower level), Washington, DC. OMB clearance requests are available at the NRC worldwide web site (<http://www.nrc.gov/NRC/PUBLIC/OMB/index.html>). The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T-6 E6, Washington, DC 20555-0001, by telephone at 301-415-7233, or by Internet electronic mail at BJS1@NRC.GOV.

Dated at Rockville, Md., this 27th day of April 1999.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,
NRC Clearance Officer, Office of the Chief Information Officer

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-302]

Florida Power Corp; Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted a request by the Florida Power Corporation (FPC) to withdraw its October 16, 1998, application, with supplement dated December 22, 1998, for an amendment to Facility Operating License No. DPR 72, issued to FPC for operation of the Crystal River Nuclear Generating Unit 3 (CR-3) located in Citrus County, Florida. Notice of consideration of issuance of this amendment was published in the **Federal Register** on November 18, 1998 (63 FR 64116).

The proposed amendment would have changed the CR-3 Final Safety Analysis Report (FSAR), Improved Technical Specifications (ITS) and ITS Bases to resolve an Unreviewed Safety Question (USQ). This USQ was created by changing the normal standby position of valves DHV-34 and DHV-35 (low pressure injection (LPI) pump suction valves from borated water storage tank) from normally open to normally closed. Maintaining these valves normally closed had been determined to be necessary to ensure assumptions used in fire protection analyses remain valid. The proposed amendment would have also added new ITS surveillance requirements for verifying on a periodic basis that the LPI system components and piping, and the
